Selected Projects

1. FrankensFile (File Recovery App)

- **GitHub:** FrankensFile

- **Description:** A desktop application that recovers files from flash drives or other types of drives. Implemented a user interface that allows users to select specified file types for recovery.

2. Four Pics One Word (Clone)

- **GitHub:** Four Pics One Word (Clone)

- **Demo:** Four Pics One Word (Clone) Demo

- **Description:** A mobile game application developed using React Native, inspired by the popular game "4 Pics 1 Word" that I used to play during my teenage years.

3. My Portfolio Website

- **GitHub:** Lerry's Portfolio

- **Website:** Lerry's Portfolio

- **Description:** A personal website showcasing my work and projects. Built using Node.js, MongoDB, HTML, JavaScript, and CSS.
